The screenshot shows the IntelliJ IDEA IDE interface. The main editor displays Apex code for a controller class. The code includes a query to retrieve accounts with an annual revenue greater than 1,000,000 and a debug statement that outputs the account number and annual revenue for each record.

```
1 List<Account> accounts =
2 [
3     SELECT Id, AccountNumber, AnnualRevenue
4     FROM Account
5     WHERE AnnualRevenue > 1000000
6 ];
7 for (Account account : accounts)
8 {
9     System.debug(account.AccountNumber + ' = ' +
10     account.AnnualRevenue);
11 }
```

The right-hand pane shows the execution results of the debug statement. It displays a list of accounts with their IDs, account numbers, and annual revenues. The data is as follows:

Account ID	Account Number	Annual Revenue
